DETAILED ACTION

Claim Status

Applicants' amendment dated August 29, 2008, has been entered. No claims were amended. Claims 9 and 10 have been cancelled, and claim 15 was newly added. Claims 1-8 and 11-15 remain pending in the application. Claims 1-8 and 11-14 stand withdrawn from further consideration, without traverse, as drawn to non-elected inventions.

New claim 15 is subject to further restriction necessitated by Applicants' claim amendments, as set forth below. Claim 15 introduces a plurality of distinct protein sequences not previously examined. It should be noted that restriction between plural, distinct inventions is discretionary on the part of the examiner in utility patent applications (see MPEP § 803), and since 37 CFR 1.142(a) provides that restriction is proper at any stage of prosecution up to final action, a second requirement may be made when it becomes proper, even though there was a prior requirement with which applicant complied. *Ex parte Benke*, 1904 C.D. 63, 108 O.G. 1588 (Comm'r Pat. 1904) (See MPEP § 811.02).

New Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claim must be restricted.

Claim 15 comprises a protein comprising the amino sequence of SEQ ID NO: 1 or SEQ ID NO: 30. As previously set forth on pages 3-4 of the restriction requirement dated March 27, 2008, the different protein sequences have different structural sequences, not commonly shared, and thus lack unity of invention. Applicants are required to choose a single specific SEQ ID NO as the protein sequence for examination. This is not a species restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
